

DIGAMBER SINGH

Senior Technical Lead | Java | Spring Boot | Microservices | Kafka | Kubernetes | Docker

+91 78921 20426 @ digamber.bara@gmail.com
linkedin.com/in/digamberbaral Bangalore, India

SUMMARY

Results-driven Senior Technical Lead with 9.5+ years architecting scalable Java/Spring Boot microservices and Kafka-based streaming systems. Led teams of 5–8 engineers in Agile environments, delivering 25–50% performance gains and 40–80% improvements in automation coverage/defect detection. Hands-on expertise in Docker, Kubernetes, AWS/GCP, CI/CD, Playwright/BDD testing. Proven in mentoring, cross-functional collaboration, and production reliability for fintech/enterprise high-throughput workloads. Prototyped Spring AI for intelligent code assistance in microservices workflows.

EXPERIENCE

Senior Technical Lead 11/2023
Comviva Technologies Ltd Bangalore, India

- Leader in providing mobile solutions and services
- Architected scalable Spring Boot microservices for Quote Management and Salesforce Integration, reducing API latency by 25% and enabling real-time data sync for high-volume transactions (100k+ daily), accelerating business decisions by 1–2 days.
 - Led a 5-engineer Agile team: task delegation, mentoring juniors on microservices, TDD, and best practices, improving sprint velocity by 20%, and reducing miscommunication and production incidents through optimized processes.
 - Designed and implemented Jenkins and Bitbucket CI/CD pipelines, boosting deployment reliability by 30% and minimizing manual errors with automated workflows, saving approximately 20 engineer-hours per month.
 - Pioneered Playwright API and UI automation framework, increasing defect detection by 40%, accelerating release cycles, and training dev and QA teams for higher code quality.
 - Prototyped Spring AI integrations for intelligent querying and code assistance in Kafka pipelines, exploring 20–30% productivity gains in team workflows.

Application Developer/ Backend Engineer 12/2019 - 11/2023
VMware Inc Bangalore, India

- Global leader in cloud infrastructure and digital workspace technology
- Designed and scaled high-volume billing and invoice Spring Boot microservices, improving responsiveness by 30% and transaction scalability under heavy load (millions per day) through code reviews and architectural decisions.
 - Migrated legacy ColdFusion APIs to RESTful Spring Boot microservices, enhancing cross-platform compatibility and efficiency by 25%, with knowledge transfer for seamless team adoption.
 - Evolved backend services for Informatica ETL workflows, boosting data processing efficiency by 50% through collaboration and standards guidance.
 - Authored BDD automation frameworks (React + Spring Boot) integrated with GitLab CI/CD, increasing test coverage by 80% and reducing manual testing time by 50% through team training.
 - Built REST API automation for Boomi/Informatica integrations, improving testing productivity by 50% and fostering an automation culture.

Early Career – Quality & Automation Engineering 06/2016 - 09/2019
Grexit Software & Exalogic Solutions Pvt. Ltd. Bangalore, India

- A software solutions provider focused on automation
- Developed Selenium/Appium automation and STLC processes, increasing coverage 80% and regression efficiency 25% for ERP/web applications.

EDUCATION

Post Graduate Diploma 01/2015 - 01/2016
Centre for Development of Advanced Computing (CDAC) Bengaluru

Bachelor of Technology (B.Tech) 01/2011 - 01/2015
SRM University Delhi NCR

KEY ACHIEVEMENTS

- Overall Achiever Award
Enhanced product quality by 50% through robust automation frameworks.
- Unit Leader’s Discretionary Award
Recognized for rapid Salesforce delivery and successful customer demos.
